PROFESSIONAL PROFILE

Strong understanding and practical use of Java, data structure, object-oriented thinking and program design, basic techniques of implementation and uses of databases.
With certainty I can say that I'm familiar with building a RESTful APIs for apps using Spring Boot, MySQL, JPA and Hibernate.
On the front-end I use technologies based on modern HTML, CSS, Bootstrap, JavaScript, and React including Hooks, Context API and Redux.
I'm a fast learner, hardworking, and also flexible in all fields of job.
My objectives is to find ways to be more effective, useful employee and to empower and improve my skills and knowledge.
